MOHAMED KARIM BELKADI

SOFTWARE ENGINEER | FULL-STACK, APPLIED AI & COMPUTER VISION

belkadikarim36@gmail.com | Rabat, Morocco | Local and remote opportunities | karimbelkadi.github.io

PROFILE

Computer Science and Networks engineering graduate (MIAGE) who builds practical web and desktop software, data tools, search systems, and computer-vision applications. Comfortable moving between backend engineering and user-facing features; open to full-stack, backend, and applied AI roles.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer | Independent **Sep 2026 - Present**

- Build Java and Spring Boot backend features and REST APIs backed by relational databases.
- Implement authentication, role-based access, and CRUD workflows with maintainable service and data layers.

Final-Year Project Intern | Marokko Biz, Kenitra **Feb - Jul 2026**

- Co-developed FlexTimer, a Laravel and React/TypeScript web and desktop HR platform for attendance, schedules, employee requests, and document workflows; clock-in/out events notify HR and administrators.
- Built MarocLoi, a Moroccan law search prototype combining BM25 and semantic retrieval with a local RAG assistant for questions in French, Arabic, and English.

Web Development Intern | One Fancy **2025 | 2 months**

- Developed a PHP/MySQL real-estate agency app for properties, clients, reservations, transfers, and payments.

Development Intern | ONEE **2024 | 1 month**

- Built a Python PDF ETL tool to extract and clean technical data, calculate pumping-station estimates (HMT, flow, power, cost), and generate Excel reports with charts.

SELECTED PROJECTS

Live-video fire detection | Python, computer vision

Monitors live video for flames and sends Gmail alerts with a detection snapshot attached.

Hand-gesture desktop controls | Python, MediaPipe, Random Forest

Recognizes five static hand gestures to control volume, brightness, and on-screen actions; webcam processing runs locally without saving footage.

TECHNICAL SKILLS

Programming: Python, Java, PHP, C#, C++, JavaScript/TypeScript

Web and backend: Laravel, React, Angular, Spring Boot, Java EE/J2EE, ASP.NET Core, REST APIs, Electron

AI and data: OpenCV, MediaPipe, Random Forest, RAG, BM25, Pandas, PDF extraction and ETL

Data and tools: MySQL, PostgreSQL, SQL Server, Docker, Git, Azure DevOps, Linux

Exploring: Godot/GDScript and Blender 3D modeling

EDUCATION AND LANGUAGES

Engineering Degree in Computer Science and Networks - MIAGE | EMSI, Morocco **2021 - 2026**

Languages: English (C1), French (B2)

Selected Coursera courses: Machine Learning with Python; Software Design and Project Management; Docker, Kubernetes, and OpenShift.
